"Dennes' Motto No 7"

EACH STATE, County and City should have an expert, at the end of every six months, to thoroughly examine into the affairs of every office-holder, and make a public statement of his efficiency and the condition of his office.

WHY? Because the U. S. government demands it every Four Months, and, the smaller the business, the more necessary it is that its interests should be rightly managed.

Did It.

An old countryman, being congratulated by the rector on the fact that her only son had enlisted, said: "Well, sir, after all, it was only to be expected, for, sure, the old proverb says: 'Train up a child and away he goes!'"

Ink Stains.

To remove ink stains from cloth or other absorbent substance, dissolve four ounces of citric acid in two quarts of water that has been previously boiled and cooled. Then add six or eight ounces of a strong, strained solution of borax.

Friendship.

There is no half-way house on the road of Friendship; if you don't go the whole distance you have started falsely.

Hint for Mother.

A gate between two rooms has proved a blessing to one mother. It fastened in the doorway between the nursery and mother's room. There are times when the mother likes to catch the children without being right among them. Often sewing or writing may be done more easily with the gate between the mother and the little one.

Who opens the window?

There was a discussion held recently among a crowd of ten about the opening of children. Some of the men said it was the father's fault; "They are the boys about the same amount of time every day that it takes them to have. If they took the job of other seriously and really put some time and thought on it, there would be a different story." But most of the fellows seemed to blame the mothers.

NOTHING HEARD FROM BURNING VESSEL TODAY

SANT' ANNA WITH SIXTEEN HUNDRED ITALIAN RESERVISTS, YESTERDAY WAS REPORTED ON FIRE, 1000 MILES OFF HALIFAX

New York, Sept. 13.—No further word has been received today from the liner Sant'Anna, which was reported ashore yesterday, with sixteen hundred Italian reservists on board, one thousand miles off Halifax.

Daily Thought.

Nothing is rarer in the world than a person who is at all times endurable to us.—Leopardi.

Strength or Weakness.

Trouble and anxiety are cruel masters, but wonderful teachers; they prepare us to understand the deepest mysteries, they make us strong for the greatest tasks, they open the way to incalculable treasures of sympathy and love. In a world which is fashioned to aid, enrich, and strengthen our spirits nothing comes to us devoid of meaning; everything that meets us challenges us and compels us to choose to become stronger or weaker.

How Hot Top Hats Are.

Tests with thermometers have been made to show how unhygienic men's top hats are. A thermometer kept in a top hat showed an inside temperature of 90 degrees when the outer air stood at 77 degrees and of 108 degrees when the temperature rose at noon to 90 degrees. In the evening there was a temperature outside of 68 degrees and inside of 88 degrees.

Non-Confident.

Trout, according to the common law of angling, are addicted to dark flies on bright days and bright flies on dark days. What is there to be said therefore, for the judgment, the common sense or the eyesight of a three quarter pound fish who rose in a fool and a half of crystal water and seized avidly upon a large "white miller," the time being high noon and not a cloud in the sky?

Old Naval Custom.

"Show a leg or else a purser's stocking" is the cry with which sailors in the navy are awakened. The words date back to the time when women were allowed to go on the cruises. They were permitted to stay aboard later than the men, and showed a "purser's stocking" to prove that they needed get up.

Inevitable Difference.

"My husband's ideas and mine are so different," sighed the young woman. "Well," replied her mother, thoughtfully, "the ideas of men and women are bound to differ. A woman can't see the sense in a box of cigars that nobody can wear, and a man has no respect for a new hat that you can't smoke."

Disinfecting Navajo Rugs.

Navajo rugs and Indian baskets should be thoroughly disinfected before using, as many of them have seen years of service in tepees and other places where sanitary conditions are not very good. Both baskets and rugs can be washed, and will be improved by the process.

ARDMORE CITY SCHOOLS BEGAN THIS MORNING

(CONTINUED FROM PAGE ONE)

dence standing at the end, and repeating responsively the Lord's prayer. Dr. Cooper was followed by Mayor Mullen, who spoke encouragingly to the members of the faculty upon the duties that lie before them, and of the anticipation for their success during the coming year. To the students he admonished them to take advantage of their opportunities and make the most of the advantages offered by Ardmore's magnificent High school. He was frequently interrupted during his remarks by applause from the students and faculty.

R. A. Heffner, president of the school board, spoke to the students along the lines of added improvement which had been added to the system, laying particular stress upon the special teachers' training course, established under law for graduates of the high schools, and adopted by the school board. Any former student of the High school, by taking this course and passing the examination, is entitled to a two years' certificate which entitles them to teach in any school of the state for two years without further examination. Mr. Heffner congratulated the High school also upon having more students in the state university according to population than any other city in the state, and admonished the students to maintain this record in the future. At the conclusion of his address, Superintendent Richards introduced the old members of the faculty, and Misses Bishop, Fish, McPheeters and Nichols responded in short, inspiring talks to the student body.

After the older members of the faculty had finished, the newer ones were introduced, beginning with Prof. C. H. Woodruff, principal, who in a businesslike manner outlined the work for the coming year, and stated that although practically a stranger in the city at present, he felt sure that before the year had closed he would be better pleased that he had come to Ardmore than he was at present, which would be "some" compliment to his present state of mind.

Superintendent Richards stated that the school board, as well as himself, had been grieved some time ago when the former musical director of the school declined to return for the coming term, and were at a loss to know what to do to fill that position. Happily, however, he stated that, through correspondence, he finally succeeded in securing the services of one who comes to this city with the very highest recommendations as a musician, and introduced Miss Ella Peterson, as the superintendent of music for the coming term. Miss Peterson responded in a few well-chosen remarks in which she stated that she was more than pleased with her reception in the city, and promised that, if the spirit she saw demonstrated this morning continued throughout the term, she was sure of results that would be gratifying to herself and to the patrons and pupils of the school.

Professor Buchanan, teacher of Latin, Miss Caldwell, teacher of history, and J. H. Biles, teacher of manual training, also spoke briefly of the work they were hopeful of accomplishing during the coming term.

Pandemonium broke loose when the name of Harry Mead, director of athletics, was called. Mr. Mead was formerly connected with the High school in the capacity of coach, and during that time Ardmore High school won about all the first honors among the schools of the state in sight, inspired by the dynamic energy of Mr. Mead. He talked to the boys along the lines of athletic training,

Don't Wait

Until the cold snap hits you to have your heavy clothing cleaned for Fall use. Phone us to call now and we assure you of service that can only be given by a modern Dry Cleaning Plant.

J. F. BUCHANAN
Phone 71 Merchant Tailor and Dry Cleaner
"Not how cheap, but how good"

and told them to become interested in athletics in some of its branches, and, instead of Emerson, quoted a little of Abe Martin to fully illustrate his point.

Mr. Mead is intensely popular with the student body, and has no trouble in getting the best there is in them upon the track or field. The outlook for athletics in the Ardmore High school this season is extremely flattering in present, and Mr. Mead told the boys that if they would stay with him this season they would again find their names recorded "among those present" at all athletic events in which the school participated.

At the close of his remarks, the principal made announcements of routine work, followed by Superintendent Richards, who made the closing remarks of the day. Superintendent Richards recited the fact that the alumni of the A. H. S. have decided upon organizing and holding monthly meetings at the High school, likewise offering their service wherever needed for the betterment of the institution. Miss Allie Mae Gwinn, an alumnus, at present a student of the state university, invited every graduate member of the Ardmore High school, to come to Norman to the state university, the second best school in the state.

During the exercises, the High school orchestra, under the direction of Sol Lowenstein, rendered inspiring selections. The orchestra this year will be larger than it was last. Only one old member has left and in her place will be added several who are interested in music.

The enrollment at the High school this year will be 350, a substantial increase over last term.

The opening of the various ward schools were attended with appropriate exercises, and the school year in Ardmore begins with every indication that it will be the most successful in the history of the schools.

The following enrollment was reported from the various ward schools:

First ward.....	392
Second ward.....	355
Third ward.....	313
Fourth ward.....	318
High school.....	350
Total	1,758

Last season a contest was started by the superintendent of the city schools, or rather a campaign of earning and saving among the pupils while on their vacation. That the result has been most satisfactory is attested by the following figures:

The pupils of the First ward earned during their vacation, as reported to their principal this morning, \$1,842.65. Of this amount they saved \$532.55. Second ward, earned \$1,444.75; saved \$425.00. Third ward, earned \$940.32; saved \$186.30. Fourth ward, earned \$1,107.25; saved \$26.80. The report of the High school was not available this morning, but it is known that the students made a good showing during their vacation, and will probably be in the lead when the report is submitted.

The auditorium of the High school was well filled by parents of the pupils this morning, and Superintendent Richards stated after the exercises that he is profoundly grateful for the interest displayed by every citizen of the city in the schools, and stated privately as well as publicly that he is going to bend every effort, and in this he repeated that he felt sure that he would be ably seconded by his able staff of assistants, in making this the banner year in the history of the schools of this city.

The scholastic census of the city

this morning shows that 205 more pupils were enrolled than there were one year ago today.

ANOTHER ZEPPELIN RAID

(CONTINUED FROM PAGE ONE)

at Friedrichstadt and driven the Russians across the river, the Germans are in a better position to advance out of Dvinsk, as there is no danger of any outflanking movement. The slowness of the operations probably is due largely to the condition of the country and the heavy roads.

Every day's delay is giving the Russians a breathing space and enables them to make preparations for greater resistance on chosen lines protected by marshes and swollen rivers.

The Russians are increasing their activities in the Caucasus and it is believed that the arrival of Grand Duke Nicholas will be the signal for more important operations, which will lessen the burden of the allies, who are trying to force the Dardanelles. No report has been received from the latter front for upward of a week from the allies, although it is apparent from the Turkish reports that there has been a considerable amount of fighting.

Optimistic report is again afloat, probably due to the statement recently made by Lord Robert Cecil, under secretary of foreign affairs, that the allies are not far from a great success.

There has been little or no cessation of the artillery engagements on the western front. A few isolated attacks by German infantry have taken place, but according to Paris, have been repulsed, and there have been further air raids and much bomb-throwing.
